

Internet Safety Tips—

--Keep your operating system and application software updated/patched. Be sure to check your anti-virus as well.

--Limit your online shopping to merchants you know and trust.

--Don't ever give your financial or personal information over email, text, or phone. But if you have to send information over a website, be sure to look for indicators that the site is secure, (i.e., https:, the s means a secure site)

--If you need to create an account using a password, be sure to create a strong one. Use a combination of numbers, letters and symbols and never share your password.

--Think before you click!!!!

--Print and save records of your online transactions

--Always log off properly after completing your online business.
